

Connect. Share. Care.™

Guide Productions is proud to have played a major role in the conception and development of the HealthyCircles "Connected Health" platform. Having built the original prototype, Guide continues to work with the current HealthyCircles team to build, harness, and develop the vision; while developing the product every step of the way. Three years into maturity, HealthyCircles is undoubtedly one of the most robust platforms of its kind.

HealthyCircles is an enterprise-level platform specializing in the area of remote health care. Specifically, it is comprised of a family of dynamic, online tools that speed the exchange of a patient's relevant health information across a continuum of care in a unique, interactive and collaborative experience.

Catering to Professionals and Consumers alike, the platform seamlessly connects health care professionals to patients, their families, and other members of a patient's individualized Care Team (including other health care professionals).

Within a private-label license model, the platform is fully customized and branded to suit any particular institution's needs. HealthyCircles, being a living product, continues to grow with each new release and private-label instantiation.

Key Consumer features include:

- Personal Health Record:
 - Laboratory Results
 - Immunization Records
 - Family History
 - Problem List
 - Procedures
 - Record Storage
- Care Team Invitation and Permission System
- Secure Message Center
- Charts, Graphs and Trackers
- Medication Management Tools
- Interactive Rules Logic Health Programs
- Alerts and Notifications
- Wallet Cards and Reports

Personal Health Record

The Personal Health Record allows Consumers and their family members to securely store and manage their health data.

The Care Team Navigator allows for the design of a Care Team, linking Professionals and family members alike. Granular permission settings allow for very precise rules around sharing data.

Medication Management

Medication Management Tools not only allow for the secure management of a family's prescriptions, but also reconcile medication records and send alerts.

HealthyCircles Author is a set of tools designed to deliver interactive health programs to Consumers.

The Triage Dashboard, working with data collected by HealthyCircles Author and other sources, aggregates consumer data allowing Professionals to monitor thousands of patients within a single interface.

HealthyCircles Engage allows for population-level interventions that engage patients in Health Programs and Telehealth Services that are easily accessible through the web and mobile devices.

Key Professional features include:

- Electronic Patient Record
- Care Collaboration and Record Sharing
- Triage Dashboard of Patient Data
- Secure Messaging Center
- Medication Reconciliation
- Point-of-Care Clinical Decision Support
- Electronic Payment Recovery
- Customize Workflow Documents
- Alerts and Notifications
- Online Consultations
